Jean-Paul Clozel, CEO of Idorsia, commented: “Idorsia has been fully functional since the demerger from Actelion, and separation activities continue well on track thanks to the excellent collaborative efforts of all parties, making this innovative transaction with J&J a great success. With the rich collection of compounds we brought over from Actelion, we are working hard to advance our highly innovative pipeline and further enhance our value proposition from these assets. Discussions with health authorities are progressing well, so that we should see key compounds moving into Phase 3 in the near future.”
